Anton Branouski

Raport instalacji oprogramowania Calcurse

Calcurse to kalendarz i aplikacja do planowania dla wiersza poleceń. Pomaga śledzić wydarzenia, spotkania i codzienne zadania. Konfigurowalny system powiadomień przypomina użytkownikowi o zbliżających się terminach, interfejs oparty na przekleństwach można dostosować do potrzeb użytkownika, a bardzo potężny zestaw opcji wiersza poleceń może służyć do filtrowania i formatowania spotkań, dzięki czemu nadaje się do użycia w skryptach.

Spododobał mi się proces kompilacji programu z kodu źródłowego. W sytuacji z programem Calcurse proces instalacji nie był tak skomplikowany.

Poniżej znajdują się screeny z przebiegiem procesu instalacji.

W przypadku instalacji Calcurse nie było zależności.

```
debian@debian–vm1:~/pobrane$ wget https://calcurse.org/files/calcurse–4.8.1.tar.gz

calcurse is configured as follows.
Please check that this configuration matches your expectations.
Also give a look at the config.h file to check for preprocessor symbols.
